What is Tucker University?

Tucker University is a series of classes, 3 or 4 hours in length. Each class introduces the quilter to a Deb Tucker Studio 180 Design tool and all of the uses of that tool.

Why take a Tucker University class?

Quilters will learn how to make fundamental quilt units with high precision and low stress.

- These are strictly technique classes.
- These are hands-on learning classes. You will be sewing in class.
- No obligation to make a specific quilt top.
- You can use your stash fabric because it is all practice—no extra expenses.

What are the Course Descriptions?

Enrollment Note: Students may elect to enroll in all three current offerings or choose specific classes. One class is not dependent upon another, at this time.

Course: 401 Square Squared® and Little Houses Sunday April 2, 2023 1 to 5 pm

The Square Squared® unit can be found within blocks as well as sashing. Since this unit is often used to connect other units, the points are extremely valuable for the design to work without interruption. You will save those points with the Square Squared® tool. A secondary benefit to using deb Tucker's method of creating Square Squared® units is that you will not waste fabric. It's a win-win situation.

Expand the use of your Square Squared® tool by learning how to make little houses. Little houses have been disguised in borders and have shown up in some star blocks. You will be astounded where these units show up.

Course: 501 Corner Beam® Sunday May 7, 2023, 1 to 5:00pm

The Corner Beam® adds even more unique options to your quilt design. The combination and the twists and turns make it look as if the quilter had to work with lots of odd shape pieces when in fact they did not. The construction of a Sliver unit advances the use of the Corner Beam® and once again makes precise piecing look hard when it isn't.

Course: 601 Rapid Fire Lemoyne Star® Basic Construction Sunday June 11, 2023, 1 – 5:00pm

Volcanoes don't belong in the center of an eight-point star and they won't happen to you when you use the Rapid Fire Lemoyne Star® tool. And by the way there are no y-seams! Be thoroughly stunned when you learn how to make a Lemoyne Star using a strip method. You will be able to make blocks as small as 3" all the way up to 12' with the same level of accuracy.
